

# Verifi Ticketing API ( /rs/api/1.3/ticket )

This is the latest ticket api document as of **July/13/2018**

For a specific Verifi ticket, the ticket API stores all information on a request payload and returns back a response.

## How to validate your API credentials:

Submit a GET request to the following url: <https://uat.verificoncrete.com/rs/api/1.3/test>

The 2 options below work from either Windows, Linux or Mac:

### Option 1: Use CURL from the command line to validate your credentials:

```
curl -X GET https://uat.verificoncrete.com/rs/api/1.3/test -H 'cache-control: no-cache' -H 'content-type: application/json' -H 'verifi-user: user_name' -H 'verifi-user-pass: password'
```

### Option 2: Use Postman:

## How to submit a ticket to our production environment:

To submit a ticket, send via POST a verifi-ticket element in the following format:

<https://portal.verificoncrete.com/api/1.3/xml/ticket.xsd>

to the URL (Endpoint):

<https://portal.verificoncrete.com/rs/api/1.3/ticket>.

To authenticate, you will need to provide a username and password in the HTTP header fields **verifi-user** and **verifi-user-pass** which are assigned to you by Verifi.

The XML request payload fields are:

Field Name	Type	Description	Required
customer		Name of the customer that placed the order. Optionally, the identifier for this customer in the system that created this ticket can be specified using the @source-system-id attribute. If known, the identifier used by Verifi for this customer can be specified using @verifi-id attribute.	YES
job		Job refers to an order from customer to deliver concrete to a particular site location	YES
job > name		Name of the Job site	YES
job > address		Street address of Job site <i>Type: address-type</i>	YES
job > coordinates		Latitude and Longitude of Job site <i>Type : lat-lng-type</i>	NO
job > due-on-job		Scheduled date and time of the first delivery at Job site	NO
job > order-size		Size of total order	YES

job > minutes-between-deliveries		Time between deliveries	NO
job > volume-per-hour		Volume per hour in terms of CY or CM	NO
job > job-id		Job site ID	NO
<b>plant</b>		<b>Plant information</b>	<b>YES</b>
		Type : plant-ref-type	
<b>truck</b>		<b>Truck information</b>	<b>YES</b>
		Type : shared-entity-type	
scheduled-load-time		The scheduled time for loading the batch into the truck	NO
<b>driver</b>		<b>Name of Driver</b>	<b>YES</b>
<b>mix &gt; mix-code</b>		<b>Name of mix code</b>	<b>YES</b>
<b>load-size</b>		<b>Size of load in terms of CY or CM</b>	<b>YES</b>
<b>target-slump</b>		<b>Slump Target</b>	<b>YES</b>
		Type: slump-target-type	
batch-start		Actual loading start time	NO
batch-finish-time		Actual loaded end time	NO
net-allowable-water		The amount of water that can be added to the load by Verifi.	NO

materials > material > description	Description of material	NO
materials>material>category	Category of materials	NO
	Type: material-category-type	
materials>material> target-weight	Target weight of load.	NO
	Type: measured-weight-type	
materials>material> measured-weight	Actual measured weight of the material	NO
	Type: measured-weight-type	
materials>material> target-volume	Volume target of load	NO
	Type: measured-volume-type	
materials>material> measured-volume	Real Volume of the material	NO
	Type: measured-volume-type	
materials > material > apparent-moisture-percentage	Apparent Moisture Percentage	NO
	Type: moisture-content-percentage-type	
Materials > material > absorption-capacity	SSD moisture content. Not typically provided for materials other than aggregate.	NO
Materials > material > specific-gravity	Specific Gravity	NO
Materials > material > saturated-surface-dry	Specific Gravity Dry	NO
Materials > material > percent-actives	Percentage of material that is not water (applies to admixture materials).	NO

## Attributes

ticket-id	Required: String
order-id	Required: String
Created	DateTime

## Messages and Codes

Response Code	Description	Resolution
400	Bad request	Check your request XML
200	Success	Check your response XML

## Example: Request
